Education

The Pennsylvania State University

December 2025

College of Information Sciences & Technology

GPA 3.5

B.S. Human-Centered Design and Development (HCDD), Minor in Security & Risk Analysis

Skills

SQL, Python, Figma, Java, HTML/CSS, Docker, AWS, Burp Suite, Metasploit, Kali Linux, Wireshark

Relevant Experience

PNC Bank, Technology Development Program Associate

February 2025 - Present

- Drove internal engagement through Viva Engage campaigns, generating 70,000+ interactions
- Built a web crawler to identify and download source code from endpoints associated with malicious phishing sites
- Developed Python scripts to aggregate data from open-source and private APIs into a threat intelligence dashboard

PNC Bank, Enterprise Fraud Operations Intern

May – August 2025

- Created & deployed into production a custom Python module for error logging of Slurm jobs
- Scaled custom Python module to 20+ Python scripts to store process metadata on 100+ Slurm jobs daily
- Utilized SQL queries to analyze enterprise level fraud trends; Gained experience with HDFS, Hive, Impala, Spark, & more

American Eagle, Cybersecurity Job Shadowing Participant

June – August 2024

- Gained insight into industry standard forensic tools such as Autopsy, Wireshark, Splunk, & more
- Developed a foundational understanding of how real-world vulnerabilities are analyzed and addressed

Penn State Wyble Attention Lab, Full-Stack Developer Intern

October 2022 – May 2024

- Communicated efficiently with colleagues using slack to coordinate meetings while using GitHub to provide proper documentation of changes
- Participated in active research to adjust a computational model to more accurately simulate attention
- Worked with tools such as PowerShell, AWS, and Docker to develop web programs to simulate human reaction to stimuli

Project Work Experience

- **ShadowGen**: A Python-based utility for generating Linux /etc/shadow format password hashes for educational purposes and authorized security training.
- **Caishen** 财神: This project's goal is to provide a single cohesive solution to aid in the investigation of securities & specifically stock equities.

Certifications

- **CompTIA Security+**

Valid until March 2027
